Getting a shingles vaccine is as easy as stopping by your local Jewel-Osco Pharmacy! The new shingles vaccine is administered in two doses with a minimum of two months between doses (but not more than six months). This voucher entitles you to obtain the first of two doses of the shingles vaccine. Each dose is $174.00.

Shingles vaccinations can be administered to individuals 50 years and older, without a doctor’s prescription.

To find the nearest Jewel-Osco visit Jewelosco.com/pharmacy. No appointment is necessary. If you prefer, call ahead for a convenient time.

Company Name: Sprinkler Fitters 281 H&W
Pharmacy Instructions: BIN – 018166, Group – FL19MEBF, ID – use initials and DOB combined (i.e. AB052150). For issues, contact Avia Partners at 800-273-9166.

The Centers for Disease Control (CDC) recommends that healthy adults 50 years and older get two doses of the shingles vaccine called Shingrix (recombinant zoster vaccine), separated by 2 to 6 months, to prevent shingles and the complications from the disease. Your doctor or pharmacist can give you Shingrix as a shot in your upper arm.

Two doses of Shingrix are more than 90% effective at preventing shingles and PHN. Protection stays above 85% for at least the first four years after you get vaccinated. Shingrix is the preferred vaccine, over Zostavax® (zoster vaccine live), a shingles vaccine in use since 2006.

The vaccine helps your body create a strong defense against shingles. As a result, you are likely to have temporary side effects from getting the shots. The side effects may affect your ability to do normal daily activities for 2 to 3 days.

Most people got a sore arm with mild or moderate pain after getting Shingrix, and some also had redness and swelling where they got the shot. Some people felt tired, had muscle pain, a headache, shivering, fever, stomach pain, or nausea. About 1 out of 6 people who got Shingrix experienced side effects that prevented them from doing regular activities. Symptoms went away on their own in about 2 to 3 days. Side effects were more common in younger people.

If you experience side effects from Shingrix, you should report them to the Vaccine Adverse Event Reporting System (VAERS). Your doctor might file this report, or you can do it yourself through the VAERS website (https://vaers.hhs.gov/index.html) or by calling 1-800-822-7967. If you have any questions about side effects from Shingrix, talk with your doctor.

The shingles vaccine does not contain thimerosal (a preservative containing mercury).

This record is to be kept by the patient for his/her medical records and to share with any medical providers.
