

PLEASE think about the following statistic before you buy another product – especially before you shop at Wal-Mart (otherwise known as “Support the Red Chinese Army store”)

"There are 293 million people living in the United States. If each one would shift \$20 a month in spending from foreign made products to American made products, that would create 5 million new jobs."

Top Ten Reasons to Buy USA Made Products:

"Buy American!" might sound like nothing more than a slogan advanced by American manufacturers to sell products made in the USA, but the truth is that there are many reasons to consider buying American-made clothing, American-made toys, and other US-manufactured goods. We've listed just a few of the benefits of buying American below:

- 10) Foreign labor standards allow unsafe worker conditions in many countries. When you buy American you support not only American manufacturers but also American workers, safe working conditions, and child labor laws.
- 9) Jobs shipped abroad almost never return. When you buy goods made in the USA, you help keep the American economy growing.
- 8) US manufacturing processes are much cleaner for the environment than many other countries; many brands sold here are produced in countries using dangerous, heavily polluting processes. When you purchase American-made product, you know that you're helping to keep the world a little cleaner for your children.
- 7) Many countries have no minimum wage restrictions, or the minimum wage is outrageously low. When you choose products made in the USA, you contribute to the payment of an honest day's wages for an honest day's work.
- 6) The growing lack of USA ability to manufacture many products is strategically unsound. When you seek out American-made goods, you foster American independence.
- 5) The huge US trade deficit leads to massive, unsustainable borrowing from other countries. Debt isn't good for you and it isn't good for America.
- 4) Foreign product safety standards are low. For example, poisonous levels of lead are in tens of millions of toys shipped to the USA. When you buy toys and other goods made in the USA, you can be confident that American consumer protection laws and safety standards are in place to protect your family.
- 3) Lack of minimum wage, worker safety, or environmental pollution controls in many countries undermines the concept of "fair and free trade". No Western nation can ultimately compete on price with a country willing to massively exploit and pollute its own people. When you buy only American-made products, you insist on a higher standard.
- 2) Factories and money are shifting to countries not friendly to the USA or democracy. When you avoid imported goods in favor of American-made items, you help ensure that the United States doesn't find its access to vital goods impacted by political conflict.
- 1) As the US manufacturing ability fades, future generations of US citizens will be unable to find relevant jobs. Buy American and help keep your friends and neighbors-and even yourself-earning a living wage.

Here is a collection of websites that have links to almost every product you could think of, from Tools, to Clothing, to Shoes, and even Appliances, that are still Made in USA – Many Americans have shopped so long at Wal-Mart that they have been conditioned to think that you can only buy inferior asian junk – but that is only because that is the only choice Wal-Mart gives you – Brand A asian JUNK, or Brand B asian JUNK.

you don't pay tax on most internet products, and quite often they will ship for free if you spend over a certain amount, so if you combine that savings with the saving of your time and gas to go shopping, you can easily justify a slightly higher cost on a QUALITY Made in USA product

please take the time - RIGHT NOW WOULD BE GREAT – to open up the websites below and see all of the products that are available. I've only copied a few examples, but many of them will lead you to other websites with American products as well.

While you have the site open, save them in your Favorites file for future shopping.

And finally, make a commitment to shift AT LEAST \$20 in spending to one of these American companies each month.

That's all you and I have to do, to put 5 million Americans back to work.

I know we all get hammered with e-mails asking you to pass something along, but this could be the most important email you'll be asked to forward to your friends.

If we don't start insisting on American made products, we will lose our manufacturing jobs to foreign countries FOREVER !!!!!!!!

Talk to store managers – Tell them you insist that they put American products on their shelves, and tell managers who continue to order inferior asian products that you will spend your hard earned money at a store that supports Americans.

The next time you are shopping and a clerk asks you if you are finding what you are looking for

TELL THEM :

"No, I am looking for quality products that are made in USA and I can't seem to find any at your store, so I think I'll shop elsewhere from now on."

The best way to get this point across is with your wallet – Spend your hard earned dollars on American products and retail business owners in America will hear us loud and clear.

It's time to be patriotic, and support American workers.
