

# Where you get your vaccines may determine how it is covered

Your Group Medicare plan provides coverage for vaccines, but that coverage depends on the specific vaccine and where you get it. Knowing how your coverage works may save you from paying for vaccines out of pocket.

## At your provider's office

The Medicare Part B portion of your plan pays for the following vaccines at your provider's office and at the pharmacy:

- Influenza (flu) vaccine—once per season
- Pneumococcal vaccines
- Hepatitis B vaccines for persons at increased risk of hepatitis
- Vaccines directly related to the treatment of an injury or direct exposure to a disease or condition, such as rabies and tetanus

## Get vaccines like the ones listed below at a network pharmacy

Here are some common vaccines that you should get at your pharmacy, not from your doctor.

- **Shingles:** A virus that causes a painful rash in people who have previously had chickenpox.
- **Tdap:** This booster vaccine protects against tetanus, diphtheria and pertussis (whooping cough). (If you need a tetanus shot due to injury, Medicare Part B will cover that from your doctor.)
- **Hepatitis A:** This highly contagious liver infection can range in severity from a mild illness lasting a few weeks to a severe illness lasting several months.
- **Covid-19:** This is an infectious disease caused by the SARS-CoV-2 virus. Symptoms can be mild to severe.

## Important information for your pharmacist

Let your pharmacist know to use **BIN 015581** and **PCN 03200000** when filling your prescription for items covered under Part D.

## Got questions?

Because vaccines are covered differently at the provider's office and the pharmacy, you may want to call first to understand how your insurance covers a specific vaccine. Call the Customer Care number on the back of your Humana member ID card or sign in to **MyHumana.com**.
